

CICLABILE LUNGO IL FIUME BREMBO

Un itinerario nel cuore della Val Brembana, che unisce Zogno e San Pellegrino Terme a Piazza Brembana con un percorso di circa 25 Km. Seguendo il tracciato della ferrovia, si possono scorgere panorami mozzafiato, che si legano alla cultura e all'architettura di queste zone.

THE CYCLING PATH IN THE BREMBANA VALLEY ALONG RIVER BREMBO

As soon as you reach Piazza Brembana, there are other more challenging but equally interesting routes to try, such as the climbing to San Marco Pass on the watershed that leads from the Brembana Valley to Valtellina; or routes that lead to Valtorta or Foppolo.

The Brembana Valley cycling path, inaugurated last year, was immediately hugely successful. Starting in the town of Zogno, the path is 25 kilometres long and ends in Piazza Brembana, near the railway station building. The ancient gentle gradient (maximum 5 percent) and difference in altitude of only 240 metres make the trail straightforward and accessible to everyone who loves cycling.
